Summary

I am a software engineer skilled in multiple coding languages, and technical problem solving. Prior to this, I was a CFO and Site Supervisor for a small security company. I am currently looking for opportunities in the Atlanta area, or remotely, to contribute my skills.

Software Development Skills

JavaScript, Node.js, HTML, CSS, Bootstrap, React

Education

DigitalCrafts | *Certificate in Software Engineering* | Atlanta, GA Feb 2022 – June 2022

- Software engineering training program that covered full stack web development topics including, but not limited to, Python, JavaScript, HTML, CSS, Bootstrap, React, Node.js.

Kennesaw State University | *B.S. in Computer Science* | Kennesaw, GA Aug 2015 – May 2017

Software Development Portfolio

CoR5 Weather | <https://github.com/phantom8528/WeatherApplication> April 2022

- Member of a 4-person team building a web application that retrieves information from two sources using API and displaying that information in a web application that provides relevant information about the weather conditions in a given city, provided via user input.
- Primary responsibilities included:
 - Taking the given API (weatherapi.com) and accessing the information provided by it.
 - Identifying the second API provided by Trimble Maps through research.
 - Assisting with construction of HTML and CSS elements needed to interact with the information and writing the code needed to link all requisite files.
- Built with HTML, CSS, Bootstrap, and JavaScript, [Weather API](#), and [Trimble MAPS Development Platform](#).

Netflix Theme Login & Sign Up | <https://github.com/phantom8528/group1-fullstack-netflixclone-api> March 2022

- Member of a 5 person team building a full stack, Netflix themed sign-in and sign-up application.
- I was responsible for creating the server and connecting the frontend, backend, and database stacks.
- Built with React, Node.js, Express, and PostgreSQL.

Professional Work Experience

Blue Water Security II, Inc. | *Unarmed Security Officer, Site Supervisor, CFO* Jun 2011 - Present

- Responsible for:
 - Monitoring temperature controlled trailers and shipping containers at a logistics warehouse
 - Training, scheduling, and monitoring of multiple guards for a given site
 - Creating and maintaining the company website using squarespace
 - Managing company finances, payroll, and invoices.

Triple A Water Store, Inc. | *CEO, CFO* 2017 - 2020

- Responsible for building the company website using squarespace, which included ecommerce and customer loyalty/rewards functionality.
- Responsible for day-to-day operations inside the store and managing company finances.
